

AEROFLEX

Accessories

Aeroseal

Aeroseal is a Modified Neoprene Contact Adhesive specially formulated for bonding Aeroflex Insulation Materials firmly together. Also ideal for use with other materials such as Metal (painted or unpainted), Cork Board, Polyurethane Foam, Rigid PVC Sheet, Formica, Melamine Board or Rubber Sheet. The high water vapour resistance and good weathering resistance of Aeroseal can prevent water or moisture from penetrating the joints. Aeroseal forms a strong, firm and permanent bond between the applied materials providing long lasting service.

Aerotape

Aerotape is a flexible and self-adhesive insulation foam tape, which is made from the same elastomeric material as Aeroflex Closed Cell Insulation. Ideal for wrapping hot or cold piping and fittings. Energy efficient and very easy to use. Excellent for preventing condensation problems. Designed specially for retarding heat loss in hot piping and preventing heat gain or frost formation on cold, chilled water piping or refrigeration lines. Adheres firmly to all metals. No problem of delamination. Aerotape is specially coated with primer on the non-adhesive side for a long service life.

Airtape

Airtape Insulation Cork Tape is specially designed for all types of climates. It insulates cold pipes for all kinds of air conditioners used in cars and homes, freezers and refrigerators. Helps stop condensation problems. Ideal for retarding heat gained in cold pipes and preventing heat loss in hot pipes. Airtape Insulation Tape is an effective sound dampening material and can also be used for gasketing purposes. Airtape Insulation Tape sticks to all kinds of dry metals. It seals tightly without drying. It is flexible and will not shrink or melt within the service temperature of -29°C to 93°C .

Aerocoat

Aerocoat is a water-based paint formulated with selected pure acrylic emulsion mixed with other special chemicals. Excellent for coating onto Aeroflex insulation surfaces giving greater protection against ultraviolet rays or other adverse weather conditions. Available in shades of white, blue, green, yellow, red and black. Aerocoat can also be painted onto pipe insulation surfaces for easy identification of the different pipe functions.

Protape

Protape is an EPDM-based self-adhesive tape, specially made for adhering the joints of Aeroflex tubes and sheets. Protape provides extra holding strength to the joints and serves as a vapour barrier to prevent atmospheric moisture to penetrate the seams. It is flexible, easy to wrap or patch tightly to the insulation surface.

Aerofix

Aerofix is a polymeric rigid foam Pipe Hanger with a foam tape inner lining, that absorbs vibration of operating pipes. The outer covering consists of a special rubber tape that seals the hanger completely after installation to prevent moisture penetration. Its strong closed cell structure is ideal for insulating hangers especially for cooling pipes to prevent condensation and save energy.

Aerostand

Aerostand is made from natural rubber blended with EPDM synthetic rubber and is a load support specifically designed for air-conditioning units. This stand possesses both high compressive strength and good weathering resistance. It is very effective in reducing vibration and noise levels. Aerostand can withstand loads of upto 50kgs per piece.

Aerostand Specifications

Tensile Strength : Minimum 6.5 MPa

Elongation : Minimum 250%

Hardness : 70 ± 5 Shore A

Compression Strength @ 10% Deflection : Minimum 0.75 N/mm²

Maximum Compression Strength : Minimum 5.0 N/mm²

Tear Strength : Minimum 15 kgf/cm
