

BITZER EVOLUTION EVO7 & EVO8 UNITS

Evolution EVO7 – EVO8 Air Cooled Condensing Units

The Bitzer Evolution EVO7 & EVO8 unit series incorporates the latest compressor developments including Bitzer ECOLINE compressors, VARISTEP capacity regulation via CR11 capacity control or VARIPACK Frequency Inverter coupled with world class fan technology to produce an extremely efficient unit.

EVOLUTION EVO7 & EVO8 Outdoor Air Cooled Condensing Units are available in **Basic, Advanced & Premium** series models

Basic Series – Standard Features:

- 16 unit models available
- BITZER ECOLINE compressor
- Epoxy fin & copper tube condenser
- Centrifugal Internal reservoir oil separator
- 45L Liquid receiver c/w sight glass
- Demountable liquid line drier
- Liquid line sight glass
- Liquid line ball valve
- 3 Phase EC condenser fans
- Vertical airflow design
- Fan speed control
- Galvanised steel base
- High quality powder coated panel set
- Mechanical dual pressure control
- DP11 oil pressure switch
- Oil level monitoring and control
- Pre-wired electrical panel and componentry

Advanced Series – Standard Features:

- 16 unit models available
- BITZER ECOLINE compressor
- Epoxy fin & copper tube condenser
- Centrifugal Internal reservoir oil separator
- 45L Liquid receiver c/w sight glass
- Demountable liquid line drier
- Liquid line sight glass
- Liquid line ball valve
- 3 Phase EC condenser fans
- Vertical airflow design
- Fan speed control
- Galvanised steel base
- High quality powder coated panel set
- Mechanical dual pressure control
- DP11 oil pressure switch
- Oil level monitoring and control
- Pre-wired electrical panel and componentry
- **Bitzer proprietary unit controller**
- **VARISTEP CR11 capacity regulation**
10..100% for 4-cyl compressors
33..100% for 6-cyl compressors
- **Simple set up & commissioning via BEST tool**

Premium Series – Standard Features:

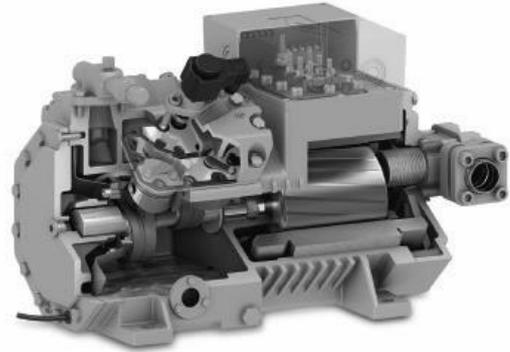

- 32 unit models available
- BITZER ECOLINE compressor
- Epoxy fin & copper tube condenser
- Centrifugal Internal reservoir oil separator
- 45L Liquid receiver c/w sight glass
- Demountable liquid line drier
- Liquid line sight glass
- Liquid line ball valve
- 3 Phase EC condenser fans
- Vertical airflow design
- Fan speed control
- Galvanised steel base
- High quality powder coated panel set
- Mechanical dual pressure control
- DP11 oil pressure switch
- Oil level monitoring and control
- Pre-wired electrical panel and componentry
- **Bitzer VARIPACK Frequency Inverter with expansion module for self-regulation included**
- **Simple set up & commissioning via BEST tool**

BITZER ECOLINE Compressor

BITZER has always paid special attention to the efficiency of compressors and a few years ago introduced the BITZER ECOLINE series, which has been optimised especially for R134a. More models have now been added to the BITZER ECOLINE series and it has been further developed for the universal use with various refrigerants with extended application ranges. This continues to incorporate the extra high efficiency and moderate pressure levels (reduced leakage rates) common to the series. This gives the BITZER ECOLINE compressors, which can also be used at very low condensing temperatures, a beneficial seasonal energy efficiency ratio beyond comparison..

Advanced Series Units

The CRII System

Capacity control is often required to match the output of a refrigeration, air-conditioning or heat pump system to the actual requirement. It prevents high switching frequency of the compressor and, thus, ensures more efficient operation of the system.

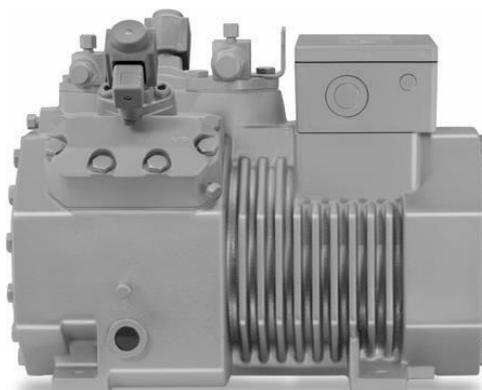

The CRII system is designed for the special requirements of intelligent system controls.

This enables higher cycling frequency of capacity control.

As a standard feature BITZER utilises a proprietary controller to operate and control the functionality of the BITZER CRII capacity control system.

The controller will start / stop, load / unload the compressor based upon the suction pressure set point.

The capacity steps can be activated /deactivated rapidly (5 s).

Premium Series Units

The VARIPACK Frequency Inverters

A frequency inverter series for all BITZER reciprocating compressors

For easy and safe capacity control, BITZER VARIPACK series offers a new generation of intelligent frequency inverters that can be used with all BITZER reciprocating compressors.

The VARIPACK frequency inverter series was specially developed for refrigeration and operation of BITZER refrigeration compressors.

The focus of the development was the easy use, the reliability and the high performance of the frequency inverters.

They can be for example put into operation intuitively and perform control functions of the refrigeration system.

The optimised adaptation to the current cooling demand of a system reduces energy consumption effectively and thus ongoing energy costs.

The VARIPACK Unit Controller (Premium Units)

The unit will be fitted standard with a unit safety control module.

This controller will perform and provide the following actions:

- Provide energy & cost savings through intelligent capacity control incl.
 - Compressor frequency inverter by suction pressure
 - Condenser Fan control also by internal inverter control
- Start / Stop the compressor
- Compressor Protection
- Easy installation
- Refrigerant configurable
- Provide energy and cost savings through intelligent fan speed regulation to achieve constant condensing temperature.
